

## **“Bible Math” Instructions**

**The Concept:** Players will have to figure out the answers to simple math problems based on numbers from the Bible.

**Items Needed:** Number handout (included as a separate PDF file).

**Instructions:** This game is a team game. Split your group into teams and give each one a set of numbers from 0-9. When a team knows the numerical answer, a runner from the team will try to be the first to the front with the correct digits. If the answer was 382, the person would need to bring the 3, 8 and 2 card up to the front. You could have a chair, stool or table as a base for the teams to try to place the numbers on. In case numbers start flying, it's best to number each team and have them write that number on the back of the cards.

Since there are 14 questions, try not to have groups of more than 14 people so that each player is able to be the runner at least once.

**Scoring:** One point for each correct answer. There's a tiebreaker if any of the teams are tied after the last question.
